catalyx

Specialists in the Science of Operational Processes

Beginning with R&D, we carefully automate and service production, packaging, and delivery processes—globally—with a sophisticated blend of products, technologies, and life cycle services.

Automating End-to-End Chains

From product concept through to delivery across highly regulated, production intense industries.

- Pharmaceutical
- Biologics
- Medical Devices
- Food and Beverage
- Automotive
- Logistics
- Cosmetics
- Other highly regulated industries

Optimizers of Operational Efficiency, Performance, and Safety

A portfolio of unmatched automation and lifecycle service capabilities;

Automation Solutions:

- Inspection
- Validation
- Verification
- Process automation
- IT/ OT integration
- Cyber security
- Architecture/Infrastructure

Services:

- Consulting
- Optimization
- Support & Maintenance
- Functional Process Management
- Technical
- Expert Deployment
- Training
- Equipment Software & Solution Maintenance
- Obsolescent Management

Powered by our award-winning solutions and platforms; SmartFactory Software Suite, OpenBIO® Bioreactor Control Platform, Returnable Transit Information (RTI), Digital LineClearance Assistant™, machine vision, robotics, AI & deep learning, data analytics and traceability.

Delivering Operational Excellence

- Improved Efficiency
- Increased OEE
- Increase Safety & Quality
- Performance
- Compliance Excellence

## Multisite. Multinational. Multilingual. Multiscale. One Vendor.

We offer, scale and an unparalleled perseverance in the face of highly complex challenges to see our customers through to success. We remove the complexity, inefficiency, and expense of multiple-vendor management schemes by having diverse and discrete functions at scale and a highly integrated—'local everywhere'—presence.

Why Catalyx

- Peace-of-mind working with a technology solutions partner who places the deepest value on long-term customer relationships
- Diverse and discrete functions at scale
- Global business with Local presence
- Better bottom line through improved performance measurable at the margins

Where Companies are Using Catalyx Today to Optimize Their End-to-End Value Chain

- Research and development
- Manufacturing
- Packaging
- Logistics
- Services
- Maintenance, repair and operations
