

## Maternity Assessment

As pioneers of the SIRI framework in Belgium, we use our extensive experience in manufacturing to assess your organisation's digital maturity.

## Smart Automation

Data is the backbone of your organisation and enables an AI-driven future. We combine PLC and SCADA expertise with a vendor-agnostic approach to make sure you get the objectively best solution.

## Industrial Connectivity

Our expertise in secure OT networks and protocols ensures we can connect and collect data everywhere. We bring IoT devices and edge connectivity platforms together for optimised insights.

## Low-code Development

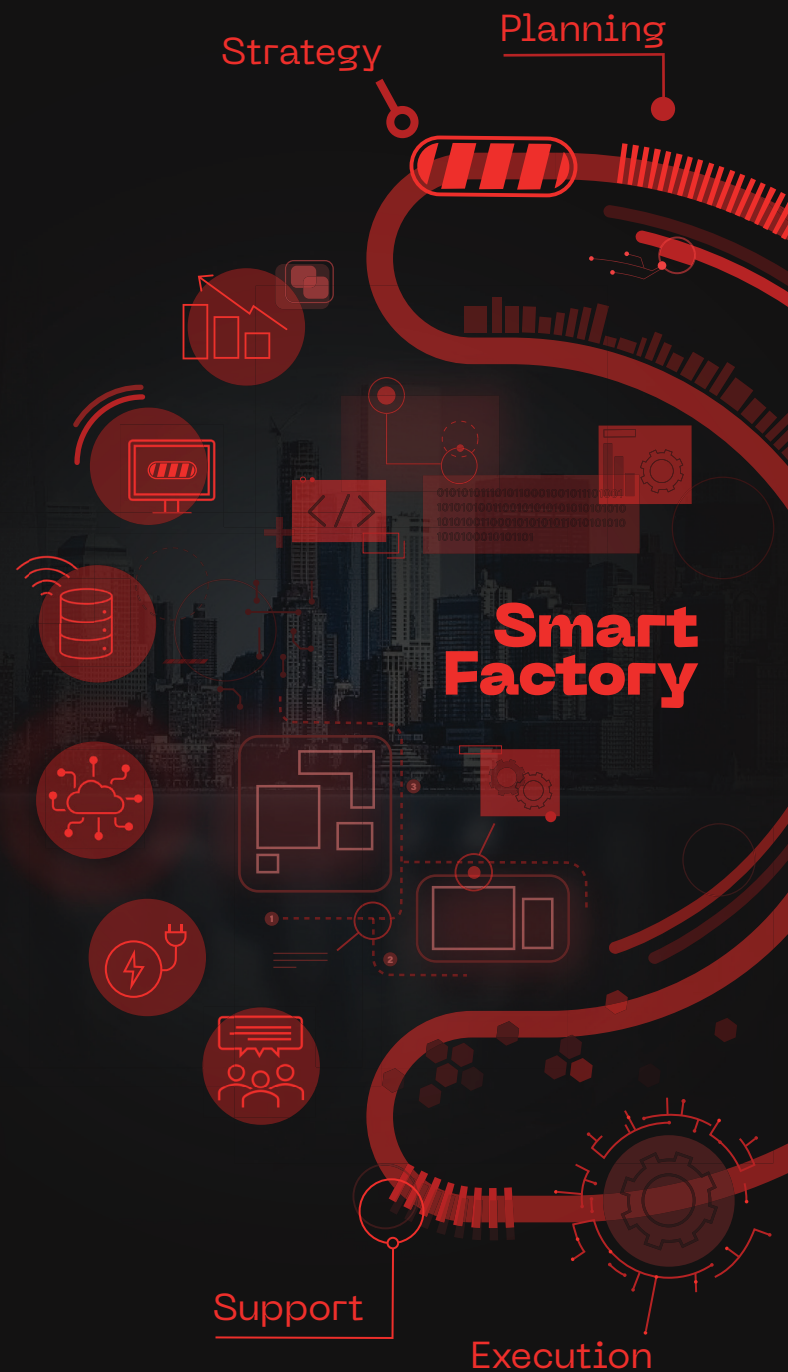

Merging the robustness of OT data with the innovation of IT insights, we use the Microsoft Power Platform to visualise, analyse, and guide your processes.

## E&I Hardware Engineering

Our dedicated E&I team takes care of everything from consultancy to design, project management, and construction guidance.

## User Adoption Strategy

Technology needs people to work. To ensure a successful project, we introduce Agile project approaches, soft skills, and Industry 4.0 inspiration sessions.
