SERVICE CENTER
ASSEMBLY TECHNOLOGIES

Machine building & Engineering

Torfsconstruct is a family business in Belgium with more than 45 years of experience in machine building & engineering for all sectors of industry.

We provide the most efficient engineering solutions in cooperation with our client.

Conveyor Technique

Torfsconstruct engineer and build a wide range of conveyor systems for all sectors of industry.

Mechanical parts supply

Torfsconstruct deliver a big range of high quality mechanical products from different kinds of materials produced in our factory with the newest machine equipment.

We provide our clients with wide assortment of products: from prototype pieces to small & large series including surface treatment.

Our production options vary from CNC turning and milling to sheet metal and welding.

Bosch Rexroth service center

Torfsconstruct is service partner of Bosch Rexroth in Belgium (Flanders) for assembly technologies. Due to our large stock capacity, delivery time is only a choice of our client.

We produce customized building systems for the further self-assembling.

In addition, we propose two more options for assembling: in our factory or at site of the client.

We also engineer and build manual ergonomic production and conveyor systems using the Bosch Rexroth profiles.
