

Omata delivers a data-driven industry 4.0 platform that links together all information generated during an entire process lifecycle. It is designed as a primary data and communication platform on your products, your customer, your order in real-time, at any time. It has proven scalable business models for industry, utilities and government.

## Omata Solutions

### Industry

From shopfloor to topfloor. Omata delivers solutions for **OEE, Operator Dashboards, Quality Management, Instructions**. Always with a realtime, bi-directional integration with ERP and other existing applications.

### Utilities

For customers in **Banking, Nuclear Energy and Water Supply**, Omata offers solutions to easily manage processes within the organization and collaborate externally.

### Government

With our flexible Framework, Omata **completely digitalized** the welfare process for Belgian municipalities.
