

# OT SECURITY SERVICES

Delivering trust for your critical business

## OT Security - the all-round solution

To what degree are your OT activities protected? Are your business, warehouse & machinery safe? What about a cyber attack? Do you have everything mapped out? Investment in OT cybersecurity minimises the risk of an incident which could potentially result in loss of revenue and reputation. With e-BO Enterprises, we offer a complete end-to-end package for your organisation's security.

## An ultra-safe ecosystem

Yes. In order to be sure, the cybersecurity cycle must be complete. Infinitely. Continuously. We identify where you want to go as a company, the risks you face and what the potential impact on operations really is. Then we start protecting, while continuing to detect and (inter)act. The result is an ultra-safe OT ecosystem. At e-BO Enterprises, we have moulded this into a unique concept: AIDA.

## AIDA - 4 services, 1 OT security ecosystem

The AIDA ecosystem offers an answer to all OT security questions while also implementing the solution. Do we assess just to assess? Of course not! Armed with plenty of empathy and "correctly" assessing risks, we do set realistic action points and goals, and actually achieve them.

Four steps to an adequate solution →

### AWARE

Do we understand our assets, goals and risks?

Do we know our business objectives and regulations? What is critical and what is not? Can we identify our risks, how they affect our operations, and can we manage the risks? Do we have a complete and continuous view of all our assets and their status?

### IMPLEMENT

How do we build a fortress to protect our crown jewels?

What investments should we make to mitigate risks? How can we implement the necessary solutions? How can our staff be trained and be aware to handle any situation? How will our regulatory issues be resolved?

### DETECT

Your guard for optimal protection

How can we be sure that everything is fine at any time? How can we stop the attack, mitigating the impact as much as possible? Where can we get a continuous status overview of all our assets and flows?

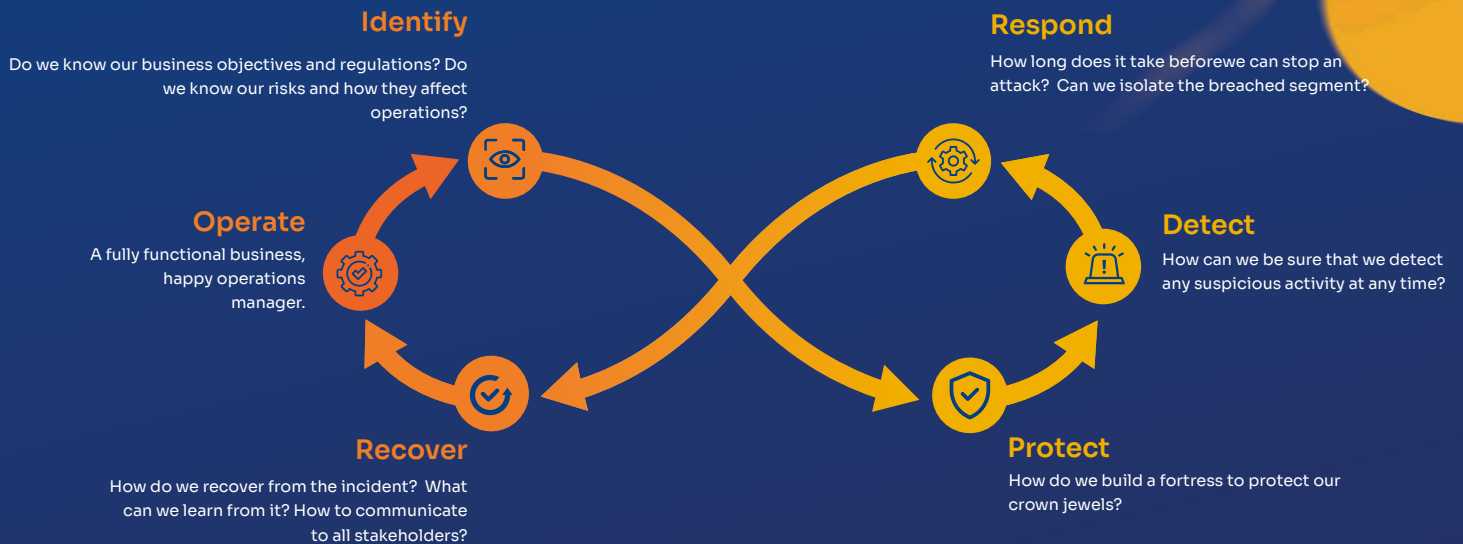

### ASSIST

Ready for action!

How can we report to our board on OT cybersecurity? Can we document and report to officials when we had a breach? How can we make sure this does not happen again? Who do we call if there is a problem?

# OUR SECURITY APPROACH

“

*Our OT Security Service is the solution for all your security gaps. The result for your IT: increased productivity, efficiency and security. That means plenty of peace of mind thanks to 1 partner and a rock solid approach.*

*Tom Ottevaere - Security Strategist @ e-BO Enterprises*

## Our Security Operation Centre

That is certainty. For you and for us. Together for ultimate OT security thanks to the e-BO SOC.

- No headaches
- No need for extra staff
- Always protected
