

YOUR SHOPFLOOR READY FOR THE FUTURE

VISIBILITY — TRACEABILITY — RESILIENCE

24FLOW IS A USER-FRIENDLY OPERATIONS PLATFORM FOR DISCRETE MANUFACTURING

24Flow's software solution supports operators, planners, quality managers, and management of make-to-order and high-mix low-volume companies.

Inspired by the principles of Lean and Quick Response Manufacturing (QRM), **24Flow** controls the flow of production orders throughout the production process. This results in shorter lead times, increased visibility, improved traceability, and less work-in-progress and inventory.

**MORE
INFO**

Optimize your production process with **24Flow**, a secure and scalable solution developed on top of the Salesforce low-code platform. Streamline your production, improve visibility, and automate workflows for an efficient and robust production environment.

24Flow is a modular platform with:

- Bi-directional **integration with ERP**.
- **Dynamic planning board** and app for work order release for **planners**.
- **Digital teamboard for operators** including time registrations, work order overviews, checklists, work instructions, and competence management.
- **Work order traceability** and **KPI reporting** for management.
- **User-friendly apps** show the right information at the right time to the right person on any device.
- **No-hassle implementation** via configuration rather than coding, thanks to low-code approach.
- Applicable in **cell- and batch-based production** in, among others, metal and wood processing, machine builders, high-tech, sheltered workplaces.
- And much more...

IS YOUR SHOPFLOOR READY FOR THE FUTURE?

Shorten lead times. Spend less time planning. Create self-steering teams on the shopfloor. Improve quality with in-process quality control. Trace production orders from A to Z. Increase the resilience and build multi-functional teams. And much more...
